MERCANDUM FOR: PIRMCTOR OF INTELLIGENCE, ID, GSUSA

SUBJUCT: METRIC System and COSMIC System

REFERENCE: CSGID-PC 904.3, Memorandum dated 10 Jan 1950 from Deputy Director of Intelligence, ID, GSUSA, to Director of Central Intelligence

- placement of METRIC by COSMIC security procedures, and suggested that a recent request from this Agency for further METRIC clear-ances be reconsidered in view of the proposed change. Subsequent to our receipt of this memorandum a communication was received from the Director of Plans & Operations (file P&O D&O.01 MATO (27 Dec 1949)) forwarding a copy of DC 2/1, Security System for the Morth Atlantic Treaty Organization. The Director, P&O, suggested that this Agency establish a COSMIC Control Office, designate Control Officers, and prepare a list of those personnel whose duties would require them to have access to COSMIC papers.
- 2. Enclosed herewith are two copies of my reply to the Director, PSO. I believe you will find it self-explanatory, and in accord with our arrangements with yourself.
- 3. Major Whelen's very effective cooperation with my people is keenly appreciated, and your suggestion that he brief those of them who will require access to COSMIC traffic is most velcome. May I suggest that he make arrangements for the briefing, when the time is ripe, either with GIA Lisison Officer to the Army, or with the listent director for Collection & Figseningtion.

· via & p /27/50.

R. H. HILLERKORTTER
Rear Admiral, USB
Director of Central Intelligence
